## Automated Information Mapping System (AIMS)

AIMS provides a flexible mapping system that supplies accurate map information designed to meet the customer needs.

AIMS staff is devoted to advancing the use of Geographical Information Systems (GIS) into the daily practice of Johnson County communities, public agencies, and private businesses. AIMS highly skilled staff can help you meet your business needs in many ways.

From providing you with countywide up-to-date digital data, to training your staff to use GIS software or on-line applications, AIMS can help integrate GIS into your everyday business practices.

The **mission of AIMS** is to provide open, efficient, and enterprise access to spatial data at a reasonable cost to aid stakeholders in making more efficient and effective decisions. Ultimately, these decisions add value to the quality of life that our stakeholders have come to expect.

AIMS is here to serve you.
