

Each year AIMS dedicates a monthly coordinator's meeting to sit down and visit with the engineering community. We discuss progress and plan initiatives on how collectively we can enrich access to spatial data, and simultaneously impact development work flows between your business and local government.

The focus group format and agenda for this year's meeting is loaded with questions and content that will certainly drive discussion, generate ideas and help AIMS prioritize direction on how we build new services and enhance existing ones. **Your participation is critical to guiding our direction.**

Topics we will be addressing include:

Data Enhancements, Additions, Plans for the Future

In the spring of 2006 imagery of Johnson County was captured using three methods. AIMS will discuss intended use, availability and potential integration of ortho, LIDAR, and oblique imagery.

Introduce CUE(Collaborative Utility Exchange) & CUEView

Late 2005, AIMS released to municipalities and utility partners, new layers and functionality within the existing web mapping module, that provided access to utility infrastructure. This section of the meeting will introduce CUEView to the engineering community and discuss availability to this useful planning tool.

Improving Communication and Workflows Throughout the Land Development Life Cycle

There are many times throughout the improvement of land when the engineering community needs to cooperate with government agencies, utility providers, and developers. Come help us understand how and how often you interact with these agencies and how having access to information may influence site analysis, design issues and implementation.

The focus group meeting is scheduled for Thursday, October 26, from 8:30 -10 AM at the new Johnson County Sunset Drive Office Building (119th and Ridgeview).

Refreshments will be provided.

Please confirm your attendance by sending an RSVP to Jay Heermann (jay.heermann@jocogov.org) by October 20. Feel free to forward this invitation to others in your organization who might also benefit from attending.
